# PARTICIPANT'S INFORMATION

## LEAFLET

Each participant must receive and read the following leaflet, or have it read to him before the interview.

**Title** [LOCAL NAME OF THE STUDY]

### Introduction

Good day. My name is \_\_\_\_\_. I am working with the organization [name of research institute] on a project to better understand men's health and relationships.

You are invited to volunteer to participate in a research study that is conducted in [XXXX PROVINCE]. Before you agree to participate in this study, you need to fully understand what is asked of you and to be sure you are completely happy with what is involved. If you do not understand the information or have any other questions, feel free to ask.

### Purpose of this interview

The purpose of this study is to collect information so we can understand men's health, families and relationships. We want to understand more about the lives of men in [COUNTRY]: how men think, how they have grown up, how healthy they are, their intimate relationships and how they relate to their families and children.

Many people are concerned that men have many health problems and some have very difficult lives. Our aim in doing this research is to learn more about men's health and lives so that the information can be used to develop ways of improving men's and women's lives. To really understand men, we have to speak to a large number of men living in all different circumstances, including those who are healthy and those who are sick, those who have "easy" lives and those who have great difficulties. Because every man is different, we are choosing men to interview for the research using chance – rather like throwing a dice. We do not know anything about the lives of the men we are asking to interview before we start talking with them. You have been invited to participate because your household was one of [20 - CHANGE AS APPROPRIATE] houses randomly picked (by chance) from all the houses in this area.

We very much hope you will help us in our work because it is only by understanding all men that we can begin to develop ways of making men's lives better for those who need help. We are asking to have an interview with you. In this interview we will ask some information about you, things that have happened in your life that may affect your health and about your relationships. The interview will take approximately an hour.

### What procedures are involved?

You are being asked to complete a questionnaire. There are no right or wrong answers; we want to know about you, your opinions or experiences. [All your answers will be saved in the computer. This computer will not record your name. The interviewer will

ask you the questions and record your answers on the little computer.<sup>2</sup>] He will answer any questions you have during the interview. We will save the responses that you give to the questionnaire using a unique identification number. This means that your name will not be linked to the answers that you give. Information that is collected from you will be put together with information from [1,500 OR NUMBER] other men.

### **Are there any risks or discomforts from participating in this study?**

We will conduct the interview in a private and safe place for both you and the researcher. The only potential risk from participating in this study is that you may feel uncomfortable answering some of the questions that may deal with some sensitive issues. The questions ask about your home, your family, your childhood, your ideas about relations between men and women, aspects of your health, your relationships with women and your views on laws and policies in your country.

### **Possible benefits of this study**

There are no direct benefits that you may get from participating in this study. However, the information collected from this study may be helpful in improving the health and lives of women and men in [NAME OF COUNTRY]. Your answers will help us make sure that the views and experiences of men like you are taken into account in designing future health and community programs.

### **What are your rights as a participant?**

Your participation in this study is entirely voluntary. You can refuse to participate or stop at any time without giving any reason. Some of the questions are very personal. Please remember that you are free to skip over any question you do not want to answer and you are free to stop answering questions at any time.

### **Confidentiality**

All the information that you give in this study will be kept strictly confidential. The consent forms that you will be asked to sign will be securely and separately stored from your answers and access will be limited to the research team and study sponsors. The consent forms cannot be linked to the answers you give to the questionnaire. The results of the study will be presented in a respectful manner and no information that could enable anyone to identify you personally will be reported. If you would like to be kept informed of the progress of our project, we will be happy to share any reports or publication we produce with you.

### **Costs**

There is no cost to you for participating in this study.

### **Has this study received ethical approval?**

Yes, the [XXX] Ethics Committee has granted written approval for this study. You may contact them using the following details should you have any concerns or queries:

# INFORMED CONSENT FORM

[To be completed on paper, not on PDAs]

I hereby confirm that the person seeking my informed consent to participate in this study has given me information to my satisfaction. He explained to me the purpose, procedures involved, risk and benefits and my rights as a participant in the study. I have received the information leaflet for the study and have had enough time to read it on my own or had it read to me and have asked any questions to have. I feel that my questions regarding participation in the study have been answered to my satisfaction. I have been told that the information I give to the study will together with other information gathered from other people, be anonymously processed into a research report and scientific publications.

These next questions ask about things you may have done over the course of your whole life from your childhood up to the present day. The research is very important in trying to understand the lives of men in **COUNTRY**.

[You will fill in the rest of the questionnaire yourself using this hand-held computer device with an audio track that reads the questions and response options to you.]<sup>4</sup> I am available to help you if you have any difficulties in completing the questionnaire or if there is anything you do not understand. For your convenience the rest of the questions will be accompanied by an audio track.

I will not look at how you answer the questions unless you ask me to and will not look at the survey once it is completed so nobody will ever know that it is you who told us particular things. We have organized it this way to protect your privacy because we want you to feel free in answering the questions.
